## NOVA: TRANSPORTATION MANAGEMENT SYSTEM
Transportation is our business, our only business.

Welcome to Aurora Software, Inc., developers of NOVA, a complete Transportation Management System for the motor freight industry. Since 1984 we have created operational, back office and database software for LTL, Truckload, Intermodal, Air Freight, Broker and Warehouse companies. All NOVA modules interface with each other for better customer service and accounting.

NOVA is Internet enabled, giving your customers the ability to rate and track shipments online. The fully integrated document imaging system allows shippers to retrieve signed delivery receipts and other documents without burdening your customer service staff.

We pride ourselves on customer service. You will always reach a person during business hours and we also provide 24/7 emergency support. Schedule an online demonstration today and we can show you how NOVA can help your business realize its full potential.

• *Truckload*	• *Air Freight*	• *EDI*
• *LTL*	• *Brokerage*	• *Document Imaging*
• *Intermodal*	• *Warehousing*	• *Accounting*
